

March 7th, 2019

To Whom It May Concern;

Greatario Industrial Storage Systems had the pleasure of working with Heidi Brookes in late 2018 when she was designated our External COR Auditor through the Infrastructure Health & Safety Association (IHSA).

From the first interaction with Heidi, she was extremely professional and transparent with her expectations and requirements for our audit. During the audit timeframe, Heidi was firm, fair and consistent; she provided both positive feedback on the areas we were doing well and was honest in her constructive criticisms of where we needed to improve. She also made everyone on our staff both in the office and on our construction crews, feel comfortable when conducting the interview component which for many can be a stressful time.

Heidi's health and safety knowledge was top notch, while never working in the tank building sector before she very quickly was able to grasp our job functions and what we were trying to accomplish on our jobsites. She spoke clearly and knowledgably on the COR process as well as health and safety program & jobsite safety requirements.

We consider ourselves lucky to have been assigned Heidi as our External Auditor, she definitely helped ease our concerns and guided us step by step, keeping us up to date on any issues or developments with our application and audit.

As an organization, we would not hesitate in recommending Heidi as either a health and safety consultant or an auditor given the knowledge she exhibited during her work with our crews and on our construction sites.

Should you require any further information, please do not hesitate in contacting me directly.

Sincerely,

Dawn Green, CHRL
