Successful Lunch and Learn!

A very successful Lunch and Learn was held at the LDCA on March 20, 2019. The room was full of many local GC's and trades seeking to learn more about the External Audit process of the COR™ Audit. 3 external auditors were present to provide an experienced open forum panel discussion. The feedback we are receiving was positive and we look forward to providing more of these events in the future. Thank you again to YCEC for sponsoring our Lunch and Learn!

If you have an idea for a seminar or would like us to present a topic to your crew or company, please contact us. ICI would be pleased to present to your group!

Spring Has Finally Arrived!

Which also means road construction projects begin again. There are many projects mobilized and prepared for an April 1 start throughout all municipalities as well as highways. As always safety is multi-faceted; the Constructors must have proper Traffic plans in place (Book 7), as well as drivers need to be mindful and aware of their surroundings, warning signs, speed limits and traffic control persons.

“As an organization, we would not hesitate in recommending Heidi as either a Health & Safety Consultant or an auditor given the knowledge she exhibited with our crews and on sites”
~ Dawn Green, CHRL
Manager, Human Resources/H&S
Greatario Industrial Storage Systems

Boots on the Ground

ICI has been visiting sites of many of our clients over the past month. Preparations for audits, assisting with JHSC set-up, documentation reviews, reviewing and observing safe work practices and procedures.

We pride ourselves on being on-site to provide hands-on, practical assistance to our clients.

Review your Emergency Response Plans. Calling 911 is NOT an emergency response plan, it is one of many phone numbers to be listed within your Response Plan. All procedures are to be reviewed, posted, communicated

and practiced.

ICI provides templates for various scenarios, however each plan is to be site specific.

Check out this great short video from the MOL to assist in the development of your Emergency Response Plans.
