To whom it may concern:

Tee Jay Electrical and Instrumentation Services Ltd (TJI) had the enjoyable opportunity in working with Heidi Brookes during Spring 2019 after much research went into retaining a certified IHSA COR Associate Auditor.

Having only completed the internal version of the COR Audit in previous years, it seemed like a daunting task in undertaking such a challenging assignment. Not knowing what to expect, I reached out to Heidi prior to her official arrival for some suggestions. She did not disappoint. From start to finish, Heidi provided consistent and relative feedback as it related to our sector in electrical construction and maintenance. She was able to bestow positive constructive criticism in the less developed aspects of our Health and Safety Program as well as highlight the areas of our strengths.

Heidi conducted the interviews and inspections with our personnel with the upmost professionalism and made all contributing team members feel comfortable and at ease during these interactions. Her knowledge and experience in the construction industry was made apparent during the timeframe of the audit, as she provided generous and valuable feedback regarding both office and field applications. Heidi's knowledge of the COR Auditing Process and the OHSAA is second to none. She was firm and consistent in all aspects of the external audit procedure. It is abundantly apparent that Heidi puts a great deal of effort into ensuring overall continuous improvement is the integral focus of her endeavors.

TJI looks forward to working with Heidi and additional members of ICI Health and Safety Consultancy in the future and would highly recommend her services to other contractors and colleagues in our industry. Should anyone require any further information, please contact me directly.

Jake Thompson, NCSO

Health & Safety Manager
